Description

Purple mushrooms are a rare and welcome treat to find, and the beautiful wood blewit is no exception. A delicious edible species, wood blewits are characterized by their brilliant violet color, pink spores, and a scent reminiscent of oranges. They are not recommended for beginner foragers because of their similarity to toxic look-alikes. Not only do wood blewit mushrooms feed on decaying matter such as leaves and wood, but they can also eat soil bacteria. Penetrating colonies of bacteria with specialized root-like tissues, they secrete digestive enzymes which turn the bacteria into a nutritious soup.

Description

Green Iguanas are not always green! Adult individuals, especially males can show many other red and orange tones. Green Iguanas are large lizards that feed almost exclusively on vegetation. Young individuals are green because it helps them camouflage and avoids predators. This species is native to the tropical regions of the American continent but it has been introduced to many islands in the Caribbean and Florida.

For consideration...

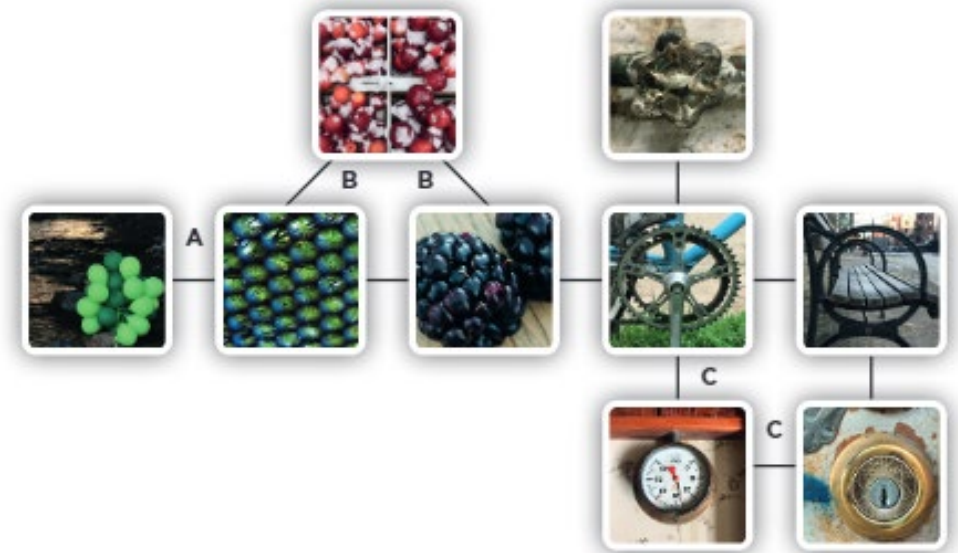

- How much does our frame of reference impact what we see, know, believe?
- How did I feel trying to decipher the images?
- What energizes me about the possibility of developing a broader vision? What keeps me from having broader vision?

Oui Si

We See

OuiSinoes (“we-see-nose”)

- Deal each person at the table 5 cards.
 - Leave the rest of the cards in a pile.
 - Flip over the top card from the pile and place it in the center of the table
 - One at a time, add cards to the table, based on how you think each new card visually connects with already played cards.
- Think of it like dominoes.**
- When you have used one of your cards, pick another from the pile, until all cards have been used.

OuiSystems

- Choose 3 cards from the deck and hold them in your hands
- The leader, from the microphone, will invite you to find people with similarities on their cards.
- If a system is called that applies to one of the cards in your hand, join that group and share what you see on your card.

For consideration...

- What are you thinking about now that you weren't thinking about before?
- How easy or hard is it for you to see beyond your initial perspective? Where can you practice broadening your perspective in daily life?
- Who, this afternoon, has been a visionary for you (seeing things you didn't see, exemplifying openness, broadening perspective)?
